ROBOTAT

GRASS CUTTER

THE ULTIMATE GRASS CUTTING ROBOT

Robust Multi-Terrain Platform

Conquer any terrain with versatile performance and rugged reliability.

Exclusively Electric

Eliminate fuel costs by removing the need for gasoline or diesel, while supporting a cleaner and greener environment.

High-Powered Motors

Powerful motors effortlessly manage thick grass and tough shrubs to deliver a clean, well-maintained lawn.

High-Strength Steel Body

Exceptional durability and stability, ensuring safety, efficiency, and rugged performance.

Adjustable Cutting Blade

Easy control of electric blade height positioning, customized to handle any area or surface.

Hot-Swappable Battery Packs

Uninterrupted power with seamless battery replacement, delivering continuous and extended operation.

TECHNICAL SPECIFICATIONS

Dimensions	Length - 1730mm, Height - 570mm, Width - 780mm
Total Weight (Robot+Module)	220kg + 50kg
Top Speed	0.8 m/s
Battery Pack	48V 63Ah Li-Ion
Run-time	3 hr Nominal per each Battery pack
Battery Ability	Hot-swappable Batteries
Mode of Operation	1 Joystick with 500m Range / Fully Autonomous
Payload	Direct Mounting - 300kg; towing - 500kg
Cutting Height from ground	Adjustable between 25.4mm-100mm
Cutting Blade Width	600mm

ABOUT THE COMPANY

ROBOTAT by NASL is a forward-driven robotics division under NASL, dedicated to transforming agricultural and industrial operations through smart automation, robotics, and precision technology. Our goal is to empower organizations with intelligent robotic systems that increase efficiency, reduce labor dependency, and support sustainable development across Saudi Arabia and beyond.

We specialize in multi-purpose electric robotic platforms and modular attachments designed to perform various agricultural and land-care tasks with unmatched precision, safety, and reliability
